

R E M A R K S

Reconsideration of this application, as amended, is respectfully requested.

THE TITLE

The title has been amended to more clearly indicate the nature of the invention to which the claims are directed, as required by the Examiner.

THE SPECIFICATION

The specification has been amended to correct a minor informality of which the undersigned has become aware. Clearly, no new matter has been added, and it is respectfully requested that the amendments to the specification be approved and entered.

THE DRAWINGS

Fig. 8 has been amended to correct the spelling of the word "Expansion".

Submitted herewith are a corrected sheet of formal drawing which incorporates the amendment and an annotated sheet showing the changes made thereto.

No new matter has been added, and it is respectfully requested that the amendment to Fig. 7 also be approved and entered.

THE CLAIMS

Claims 1, 9 and 12 have been amended to clarify that the product information, upon which the ordinary search is based, includes at least a product model and an identification of a problem, as supported by the disclosure in the specification at, for example, page 14, lines 5-8.

In addition, claims 1-14 have been amended to make some minor grammatical improvements and to correct some minor antecedent basis problems so as to put the claims in better form for issuance in a U.S. patent.

No new matter has been added, and it is respectfully requested that the amendments to the claims approved and entered.

RE: THE PRIOR ART

As recognized by the Examiner, USP 6,735,592 ("Neumann et al") discloses retrieving information based on a request entered in a natural language format.

It is respectfully submitted, however, that Neumann does not disclose, teach or suggest a technical support system (or program or method) in which a knowledge base is searched based on product information which includes at least a product model and an identification of a problem and which is input as claim content, as according to the present invention as recited in amended independent claims 1, 9 and 12.

Therefore, it is respectfully submitted that Neumann et al clearly does not disclose, teach or suggest the technical support system (or program or method) according to the claimed present invention.

And it is respectfully submitted that the present invention as recited in amended independent claims 1, 9 and 12, as well as claims 2-8, 10, 11, 13 and 14 respectively depending therefrom, clearly patentably distinguishes over Neumann et al, under 35 USC 102 as well as under 35 USC 103.

* * * * *

In view of the foregoing, entry of this Amendment, allowance of the claims and the passing of this application to issue are respectfully solicited.

If the Examiner has any comments, questions, objections or recommendations, the Examiner is invited to telephone the undersigned for prompt action.

Respectfully submitted,

Douglas Holtz
